基本检索

The screenshot shows the ProQuest search homepage with several key features highlighted by red callout boxes:

- 我的检索账户** (My Research Account): Points to the user profile icon in the top right.
- 个人书架** (Personal Bookshelf): Points to the 'Bookshelf' link in the top right menu.
- 语言选择** (Language Selection): Points to the 'English' language option in the top right menu.
- 文献类型选择** (Document Type Selection): Points to the filter tabs (All, Scholarly Journals, Books, Videos & Audio, Dissertations & Theses, More) above the search bar.
- 基本检索** (Basic Search) and **检索框** (Search Box): Points to the main search input field.
- 检索帮助** (Search Help): Points to the 'Search Tips' section below the search bar.
- 选择数据库, 按学科检索** (Select Database, Search by Subject): Points to the 'Search by subject area' section at the bottom.

The 'Search by subject area' section displays a list of databases and their corresponding subject areas, with a 'Use selected databases' button at the bottom right.

Full text Full text - PDF Abstract/Details

Abstract

Objective
 To determine secondhand smoke (SHS) concentrations in prisons during the week of implementation of a new, national prisons smoke-free policy.

Design
 Repeated measurement of SHS concentrations immediately before and after implementation of smoke-free policies across all 15 prisons in Scotland, and comparison with previously gathered baseline data from 2016.

Methods

Full text

Introduction
 Secondhand smoke is a serious indoor air pollutant linked to many illnesses including cardiovascular disease, cancer and chronic obstructive pulmonary disease.¹ Secondhand smoke in indoor environments reduce exposure to SHS² and improve health.^{3,4} SHS exposure has been a concern for workers who are or were occupationally exposed to SHS, for example, restaurant staff⁵ and airline cabin crew.⁶

Until recently, most public spaces, particularly prisons, were closed. Prisoners were exposed to SHS. Research has shown that SHS exposure has been a concern for workers who are or were occupationally exposed to SHS, for example, restaurant staff⁵ and airline cabin crew.⁶
